Roseburg Introduces New Design Collection at 2015 AWFS Fair
Four new thermally fused laminate (TFL) designs to debut in Las Vegas

Roseburg, OR— Roseburg will unveil its latest thermally fused laminate (TFL) design collection this July at the 2015 Association of Woodworkers and Furnishing Suppliers (AWFS) Fair in Las Vegas. Roseburg's 2015 Relevance Collection will be on display at booth #4441. The 2015 AWFS Fair is held July 22-25 at the Las Vegas Convention Center.

Roseburg Duramine Relevance Design panels represent the most current trends in TFL design and color. Their linear grain patterns work well at any scale. And their blend of neutral and warm colors allows them to be used with a wider palette of complementary colors and patterns:

Southern Cattails: Deep and rich, playing off the growing walnut trend. Its natural tone blurs the line between domestic and exotic.

Ruby Beach: A complex balance of warm and cool colors that makes it easy to use with a variety of patterns.

Calm Horizon: A rustic, weathered neutral tone with a subtle warmth - like a vintage beach house at sunset.

Sand Shoal: A recon veneer with a striking consistency of pattern that makes it perfect for applications of any size.

About Roseburg

Roseburg Forest Products is a closely-held manufacturer of lumber, particleboard, softwood and hardwood plywood, engineered wood products and specialty panels. The company owns land and facilities in the Northwest and Southern regions of the United States. To learn more about the company please visit www.Roseburg.com.
