

## SUSTAINABLE FOREST MANAGEMENT

In any given year, Roseburg harvests approximately 2% of its 600,000 acres of timberland to supply local manufacturing operations. Our foresters replant 6 million new trees annually, contributing to an average growth rate of 7%. This means not only is Roseburg providing local wood to fulfill production demand, but we are also simultaneously adding more trees to the states of Oregon, North Carolina and Virginia every year. We do all of this while protecting and investing in our water, soil, fish and wildlife resources. Roseburg is truly committed to sustainable forest management.

In 1971, Oregon was the first state in the nation to create a comprehensive set of laws intended to ensure sustainable forest management known as the Oregon Forest Practices Act (OFPA). Today, through continuous improvements and revisions, the OFPA remains a premier model of effective environmental protection in working forests.

## VERTICALLY INTEGRATED MANUFACTURING

Logs that go to our plywood facilities are peeled for veneer and laid up into a wide product offering of hardwood and softwood plywood panels.

After all this, any excess wood residuals are converted into green energy and used to power the same manufacturing plants they originated from. In 2017, this process generated over 200 million kilowatt-hours of power!

Our state-of-the-art sawmill utilizes the most advanced technology to maximize the use of wood fiber in the production of lumber.

All facilities send their residuals to our particleboard and MDF plants, where we reuse over 1 million tons of wood residual material every year.

Both lumber and veneer products supply our engineered wood plant in the production of LVL and I-joists.

## ENVIRONMENTAL PRODUCT DECLARATIONS

Includes cradle to gate life cycle analysis (LCA)  
Outlines carbon sequestered and global warming potential (GWP)

## FSC® CERTIFIED MANUFACTURING PLANTS

Roseburg is one of the longest continually FSC certified companies in the U.S., offering FSC certified products since 2008.

## TRANSPORTATION SMARTWAY PARTNER SINCE 2010

Our environmental consciousness doesn't stop at production. Freight transportation is one of the fastest growing impacts on the environment; and as consumer demand increases, we are committed to respond with the most efficient transportation practices.

## CO2

### PACIFIC POWER: CERTIFICATE OF BLUE SKY RENEWABLE ENERGY SUPPORT

In 2017, Roseburg supplied 8.7 million kilowatthours of renewable energy, which reduced our carbon footprint by 7,937,864 pounds of carbon dioxide. This is equivalent to not driving a car 26,937,423 miles which equals approximately 5,324 trips back and forth across the U.S.
