MDF Shelving

TECHNICAL DATA COMPARISON

	Roseburg Shelving	Competitive Shelving
Edge Profile	Square or Bullnose	Square or Bullnose
Widths*	11 1/4", 15 1/4", & 23 1/4"	11 1/4", 15 1/4", 17 1/4", & 23 1/4"
Lengths*	97", 121", 145", & 193"	97", 145", & 193"
Thickness	17MM standard (3/4" available)	17MM standard (3/4" available)
Modulus of Rupture/ MOR	3,500 psi 2413 N/mm2	2,500 psi 1724 N/mm2
Modulus of Elasticity/MOE**	350,000 psi 2413 N/mm2	250,000 psi 1724 N/mm2

*Actual length and width panel dimensions are one inch longer than stated size

**Measurement of the stiffness of the shelf.

INSTRUCTIONS FOR USE

Machining Sawing Tips: With the proper selection and maintenance of power cutting tools, Roseburg shelving can be easily machined. Carbide tipped cutting tools are recommended for sawing, drilling, routing, joining, fastening and edge-machining. Remember: a portable 7-1/4" saw can chip the upper side of the panel (saw face down), and a table or radial-arm saw can chip the bottom edge (saw face up). In all instances, the saw should be maintained so as to ensure low vibration and smooth runout, clean collars, and sharp, properly ground teeth.

Handling and Storage:

- Store indoors in a dry, clean, well ventilated area.
- Separate units with clean, dry spacers of uniform thickness aligned carefully. Use a minimum of three spacers for panels up to 8' long and four or five spacers for longer panels, to prevent warp.
- Avoid temperature and moisture extremes.
- Keep units off the floor to prevent moisture absorption.
- Before processing, allow panels to equalize to surrounding moisture and temperature conditions for a minimum of 72 hours.
- For appropriate shelving design and installation guidelines refer to [CPA Technical Bulletin](#).

FEATURES AND BENEFITS

Roseburg Shelving offers an easy solution for creating custom closets, pantries, and shelving as needed. Our shelving is made using Roseburg MDF, resulting in stiffer and stronger shelves compared to other products in the market. The shelving is pre-cut into three standard widths, making installation quicker and easier than cutting 4 x 8 sheets. Durable and sturdy, our shelving products are suitable for various residential and commercial applications.

COMMON APPLICATIONS

- Kitchens
- Pantries
- Closets
- Craft rooms
- Childrens rooms
- Laundry rooms
- Garages

STANDARDS & CERTIFICATIONS

- EPA Formaldehyde Emission Regulation, TSCA Title VI compliant
- CPA ECC Sustainability Standard
- 95% pre-consumer recycled content in accordance with ISO 14021 requirements.
