

**Roseburg**  
**BB Marine**  
 SANDED PLYWOOD

**A BETTER 'BB'**

When it comes to marine plywood, performance matters. Which is why Roseburg has developed an **improved BB marine standard that is engineered to perform**. Fully sanded and constructed with 100% B-grade veneers on the face and back. Roseburg is raising the bar on BB marine plywood with a panel designed to meet the most rigorous project demands.

**BEST IN CLASS FACE AND BACK**

We have a higher standard for the B veneers that go into the face and back of our Roseburg Standard BB panels. Industry grade standards allow for unlimited wood and synthetic repairs. **The number of wood repairs allowed on the face/back of Roseburg's BB marine is capped at 25.**

**ABSOLUTELY NO KNOTS**

Open or solid, face or back, Roseburg's elevated BB specification **does not allow for any knots**. Industry grade standards allow for up to 1" solid knots.

**PEAK PERFORMANCE**

Roseburg Standard BB marine is the perfect panel for non-decorative applications **when performance is most important**.

**ENDLESS POSSIBILITIES**

Strong, stiff, and durable, Roseburg Standard BB marine is **ideal for pontoon boat decking, painted applications, boat houses, outdoor furniture, concrete forms, and more.**

**SPECIFICATIONS & PACKAGING DETAILS**
